## The Keyword Research Process

## What are niche topics?

---

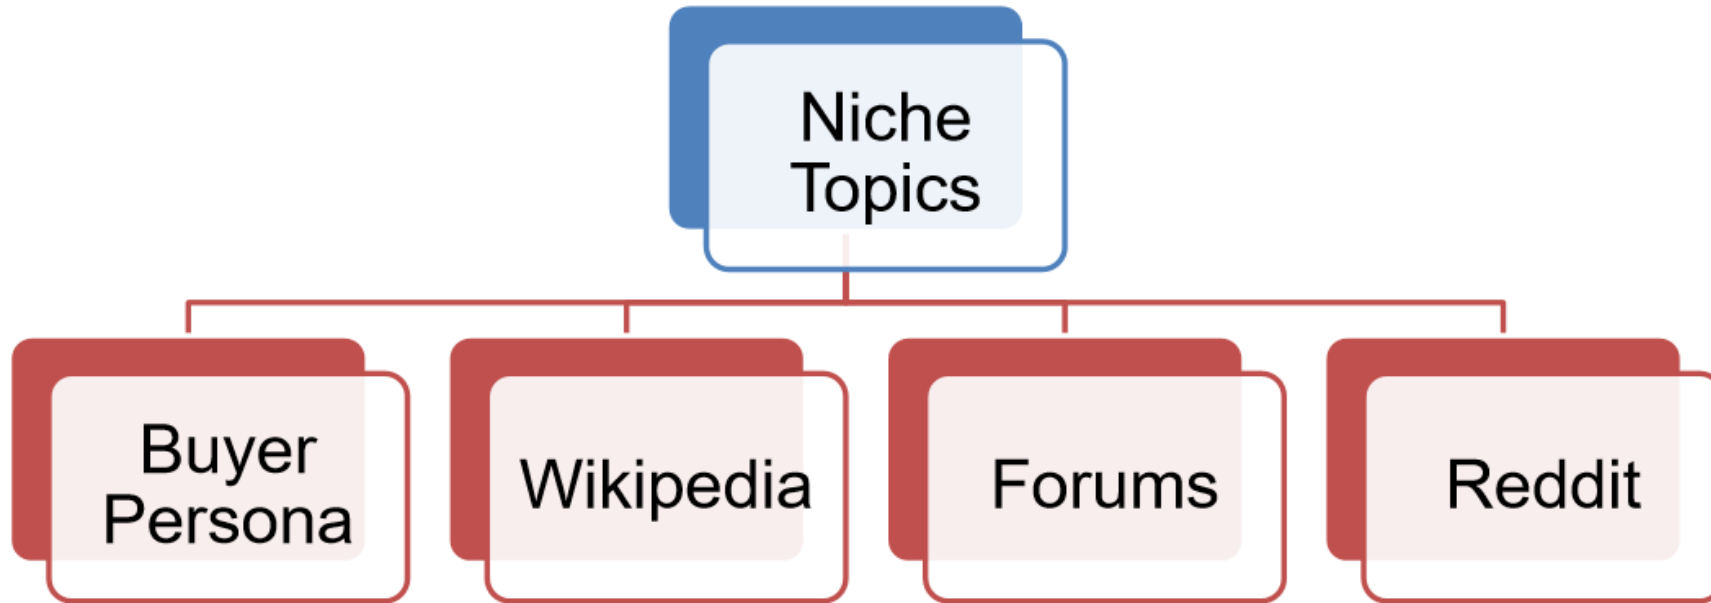

A Niche Topic is a topic that your target customer is interested in.

For e.g. For a website that has content related to Tennis, niche topics would be:

- Nutrition for Tennis players
- How to hit a forehand
- How to be a professional Tennis player
- Best Tennis coaches in India
- Tennis shoes

## How to find niche topics?

---

# Buyer Persona

---

- Gender
- Age
- Approximate Income
- Hobbies & Interests
- Things that they struggle with (challenges)
- What they want to accomplish

## Buyer Persona: Parent of school tennis player

---

Age: 35 – 54

Gender: Male or Female

Approximate Income: 10 Lac – 75 Lac per annum

Hobbies & Interests: Roger Federer fan, playing tennis with friends, spending time with son or daughter

Things they struggle with: Having more time to exercise & stay fit, spend time with kids

Goals: Son or daughter to play Tennis for school team, district or state level.

What would a father / mother search for?

---

“How to teach kids tennis”

“tennis racquet for 8 year old kid”

“tennis shoes for kids”

“tennis coaching facilities in <location>”

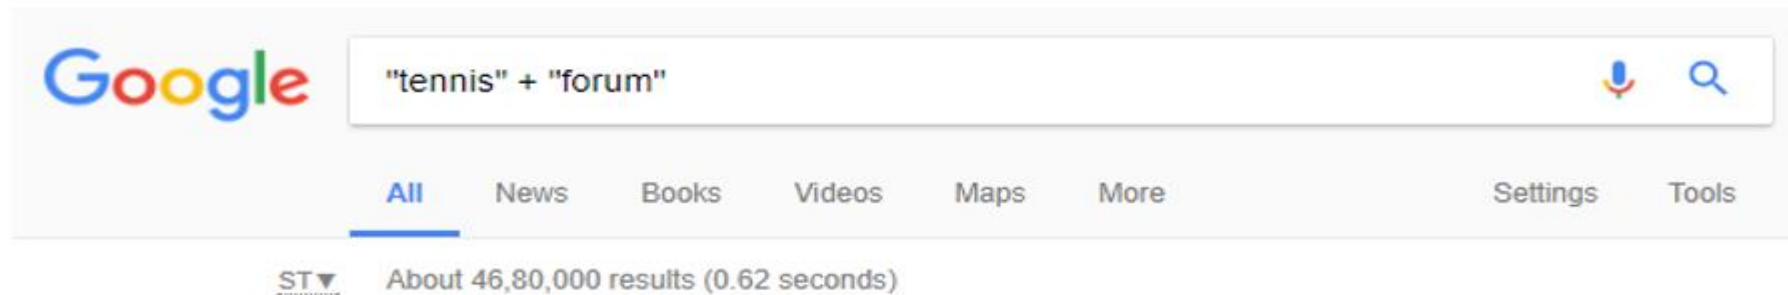

“schools with tennis coaching”

# Prioritize Keywords

Easier to rank for low search volume keywords since most competitors would want to focus on the high search volume keywords.

# The Search Demand Curve

# Why we should choose long tail

---

## Popular Search Terms

- Consist of 30% of daily searches
- Highly competitive
- Searcher is probably browsing, not ready to buy.

## Long-tail Keywords

- Consist of 70% of daily searches
- Less competitive
- Searcher is almost ready to buy

## Assessing Keyword Value

---

- Is the keyword relevant to your website's content?
- Will searchers find what they are looking for on your site when they search using these keywords?
- Will they be happy with what they find?
- Will this traffic result in financial rewards or other organizational goals?

## Determine Keyword Targeting
